LANGUAGES

English

Western Washington University, Bellingham, WA — *English*

September 2020- June 2024

English Major with a passion for creative writing. Over four years I have learned several facets of writing; including crafting a story, being able to cater my writing to a specified audience, and being able to take in suggestions and rework my writings in a manner that utilizes those

suggestions. Beyond skills in writing, this area of academia has also instilled in me capabilities which can be useful in a myriad of working environments such as: communication, collaborative work, and being a source of reliance for those I am working with.
